DETAILED ACTION

REJECTIONS WITHDRAWN

1. All of the 103(a) rejections set forth in the non-final rejection of 4/26/05, pages 2-4, paragraphs 3-6 have been withdrawn.

REJECTIONS REPEATED

2. There are no rejections repeated.

NEW REJECTIONS

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-8, 10-15, 16-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wirth (US 5171640) in view of Beuzelin et al. (GB 2288177, cited by applicant).

Wirth discloses multilayer materials containing ethylene/vinyl alcohol copolymer (a) and styrene-based polymer layers (b) in a b/a/c structure (see claim 7 at col. 6). The materials exemplified, maleic anhydride modified styrene (column 2, lines 20-32), includes ones in which the (b) layer is 69 to 79% of the total material (see col. 3, Table 1), based upon the thickness of the (b) layers and the sum of the thicknesses of all

Art Unit: 1772

layers, with the modified styrene-based polymer being present in the outer bonding layer in a ratio with respect to the weight of the gas-barrier resin of at least 0.1:1 (since layer (a) has a thickness of from 20 to 1500 microns and layer (b) has a thickness of from 100 to 1500 microns, column 2, lines 11-32).

Wirth does not disclose that the multilayer film has an overall thickness of from about 10 microns to 100 microns and the modified styrene based polymer having polar groups thereon.

Beuzelin et al. disclose a multilayer film which has an overall thickness of from about 10 microns to 100 microns (page 14, line 24 through page 15, line 12) and the modified styrene based polymer having polar groups thereon (page 7, line 24 through page 8, line 9) in a food/tray type container (page 1, lines 7-15 and page 15, lines 17-23) for the purpose of providing improved adhesive strength and resistance to separation of layers (page 15, lines 17-23).

Therefore it would have been obvious to one of ordinary skill in the art at the time applicant's invention was made to have provided a multilayer film which has an overall thickness of from about 10 microns to 100 microns and the modified styrene based polymer having polar groups thereon in the multilayer materials of Wirth in order to provide improved adhesive strength and resistance to separation of layers as taught or suggested by Beuzelin.

Beuzelin discloses a polystyrene layer as a substrate (page 13, lines 9-15).

ANSWERS TO APPLICANT'S ARGUMENTS

5. Applicant's arguments filed 2/2/06 have been carefully considered but are moot in view of the new grounds for rejection set forth above.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
